perous times and become more freq quent invite less favorable conditions offers ex lence that with an elemen log the committee on bornetty by a mar ter of motiev and not of principle Such persons will be honour so long we'll pays, but when greater profits sea possible by resorting to devious methods there is tittle hestintion to turn weide from the paths of rectiinde. It takes courage to face a loss and bear it but the honest individual makes the hest of such a Sit untion. An upright course is far herrer policy as well as correc principle, than recourse to fraud. Men who plot to defraud their creditors are deserving of no mercy. If they engage in arson they menace the whole community, so that the matter is of general concern and not confined to creditors.

## MEXCIAN OIL.

Reports of all shipments from Mexico aggregating upwards of 2. 660,000 barrels monthly are not necessarily conclusive against more or less authoritative opinion that the developed petroleum areas of the southern republic are nearing exhaus tion. On the other hand, there is no warrant so far as has been disclosed for assuming that because some wells have "gone to salt water" and others are expected to follow. Mexico will not continue to be an enormous producer of all. Already explorers are meeting with success in drilling sections not heretofore tapped. It seems unreasonable that in Mexico, as in the United States it will be found that oil pools are widely distributed. At all events, it is only through drillREADJUSTING WAGES

Laws which operate in econ affairs are often overlooked by both against a readjustment of wages and certain employers are intent on reducing wages costs to an extent that will permit them to operate their

plants profitably. Many of the difficulties in the way of a return to normal conditions in ndustry have their rise in the failfor republication use of employers and employes to recognize the fact that the periodical rise and fall of wages and prices is but a centuries old economic law a

# ANNOUNCEMEN

# CALIFORNIA PETR AND REFINING OF COLUSA COUNTY, CALIFORNIA

THE OIL INDUSTRY, this company owns a perpetual lease upon 720 acres, right in the heart of the new oil district in Colusa County California and is now prepared to take subscriptions for treasury stock. The directors of this company a short time ago, authorized the sale of 100,000 shares of the Treasury stock at 25c per share, but since that time the company has practically made arrangements with the California Corporation Commission to sell its stock in that state, and when those arrangements have been completed the company will open an office either in San Francisco or Los Angeles and the price of the stock will be raised to 50c per share.
